TAX & ACCOUNTING PROFESSIONAL | CPA CANDIDATE | DATA ANALYTICS

Tax & Accounting professional with 2.5+ years of experience across PricewaterhouseCoopers and H&R Block, specializing in U.S. federal tax compliance, partnership taxation (Form 1065), and asset & wealth management clients including Hedge Funds, Fund-of-Funds, and Private Equity. Passed TCP section of the CPA exam, pursuing full licensure by December 2026. Equipped with advanced analytical skills in Power BI, SQL, Python, and Alteryx, and actively building tax technology tools that automate financial data workflows.

AREAS OF EXPERTISE

CPA Candidate (TCP Passed) ▪ U.S. Federal Tax Compliance ▪ State & Multi State Tax ▪ Partnership Tax (Form 1065 / K-1) ▪ Asset & Wealth Management ▪ REIT & Asset Diversification Testing ▪ IRS Audit & Notice Resolution ▪ Power BI & Data Analytics ▪ Python, SQL & Alteryx ▪ Tax Technology & Automation ▪ Financial Reconciliation

PROFESSIONAL EXPERIENCE

H&R BLOCK – Madison, WI — Dec 2025 to April 2026

TAX ANALYST

Prepares Individual, Business, and Trust tax returns while conducting in-person and virtual client interviews. Provides IRS audit support, tax notice resolution, and drives client retention and revenue growth through advisory services.

- Compiled and filed 100+ Individual, Business, and Federal, State and Multi State tax returns per season with a 96%+ accuracy rate, conducting in-person and virtual client interviews
- Resolved 5+ IRS tax notice cases, reducing client penalty exposure by an average of 30% through accurate documentation and timely responses
- Grew client retention rate by 14% through targeted follow-up and cross-selling of additional financial products, contributing to branch revenue growth
- Reduced average return preparation time by 20% by standardizing interview workflows and leveraging tax software automation tools

PRICEWATERHOUSECOOPERS (PWC) – India — Jun 2023 to Oct 2024

US TAX ASSOCIATE

Prepared and reviewed federal tax workpapers and returns for Asset & Wealth Management clients including Hedge Funds, Fund-of-Funds, and Private Equity. Ensured full compliance with U.S. tax regulations across complex multi-tiered partnership and corporate structures.

- Delivered and reviewed 200+ Federal tax workpapers and returns (Forms 1065, 1120, and Foreign Filing Forms) for a portfolio of 30+ Asset & Wealth Management clients including Hedge Funds, Fund-of-Funds, and Private Equity funds
- Executed REIT compliance testing and asset diversification analyses across 10+ clients, ensuring 100% adherence to U.S. tax regulations with zero compliance deficiencies
- Coordinated 50+ Partners' K-1 packages and tax estimates for complex multi-tiered partnership structures, reducing review cycle time by 15%
- Gained proficiency in 3 new tax software platforms within 2 months, improving team processing efficiency by approximately 20%

MY CPE ONE – India — Jun 2022 to Mar 2023

US ACCOUNTING ASSOCIATE

Managed full-cycle bookkeeping and financial reporting across Investment, Trust, Real Estate, and Automobile industry clients. Handled month-end and year-end close, payroll processing, and accounts receivable & payables reconciliation.

- Managed full-cycle bookkeeping for 20+ clients, processing 500+ monthly transactions with 99%+ reconciliation accuracy across bank, credit card, payroll, and inter-company accounts
- Generated monthly, quarterly, and annual financial statements; identified and resolved $50K+ in cumulative reconciliation variances across accounts receivable, payables, and payroll
- Streamlined month-end closing process by 30% by standardizing journal entry templates and reconciliation checklists, reducing close cycle from 5 days to 3.5 days

- Maintained organized financial records for 20+ client accounts, cutting document retrieval time by 40% through improved digital file architecture

PROJECT EXPERIENCE

FINFLOW MCR – AI-POWERED BANK STATEMENT PARSER 2025

CREATOR & DEVELOPER | TAX TECHNOLOGY / FINANCIAL DATA AUTOMATION

Independently designed and built a hybrid bank statement extraction engine to automate the conversion of unstructured financial documents into standardized, audit-ready transaction datasets. Combines deterministic local parsing, page-level document classification, and AI fallback processing to handle diverse statement formats with full source traceability and OCR diagnostics.

- Engineered a three-layer hybrid extraction pipeline (deterministic parsing → page-level classification → AI fallback) capable of processing bank statements across multiple formats and layouts
- Integrated OCR diagnostics and full source traceability into output datasets, producing audit-ready transaction records that meet financial review standards
- Reduced manual bank statement processing work by 98%, eliminating hours of manual data entry and enabling scalable, repeatable extraction workflows
- Portfolio & source: nikhildaswani.github.io
